HANZ OFOSUHENE-SINTIM

Engineering Student — Electronics & Embedded Systems | Internship Search

PROFILE

Engineering student specializing in **electronics and embedded systems** at JUNIA ISEN Lille, with a strong background in computer engineering gained internationally (KNUST, Ghana). Experienced in the design of **integrated hardware-software** systems —from component selection to functional validation. Rigorous, autonomous, and possessing experience in **student leadership** within a demanding technical environment. Available for an **internship** in electronics or embedded systems.

TECHNICAL PROJECTS

Automated water level control system

- Design of an embedded fluid management system based on an **Arduino Uno** and ultrasonic sensors.
- Programming the microcontroller logic for the automatic triggering of a pump according to **calibrated level thresholds** .

Digital thermometer

- Design and programming of a temperature measurement system on an **MSP430** microcontroller .
- Complete integration of the processing chain — from **analog capture** to digital display.

Custom power supply

- Complete implementation: schematic design using **KiCad** , component selection and validation of voltage constraints.
- Manufacturing and testing a **functional prototype** .

Software architecture — Online sales platform (C++)

- Development in **C++** of a complete server-side architecture, without third-party libraries.
- Product data management and business logic via custom **data structures** .

PROFESSIONAL EXPERIENCE & LEADERSHIP

Department Head — ACES, KNUST
August 2025 – Ongoing · Ghana

- Student association management: **budget management** and coordination of multidisciplinary teams.
- Technical and logistical management of **CODEFEST 2026** , from design to coordination of stakeholders.

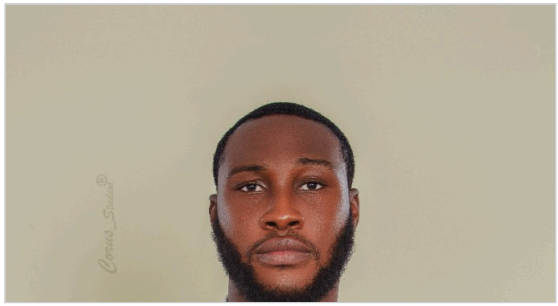

Software Development Intern — Spagard Technologies
October – December 2023 · Ghana

- **Participation in the server-side** development of internal management systems.
- Database structuring, support for debugging and **interface testing** phases .

TRAINING

Master's Degree — Electronics and Embedded Systems · In progress
JUNIA ISEN
Lille, France

Bachelor of Science in Computer Engineering · 2026
Kwame Nkrumah University of Science and Technology (KNUST)
Kumasi, Ghana

CONTACT DETAILS

City: Lille, France

Telephone: +33 6 05 73 14 16

Email: hanzsintim@gmail.com

SKILLS

Languages: C, C++, Python, HTML/CSS, JavaScript

Embedded Systems & Hardware: Arduino Uno, MSP430, KiCad (PCB design), Semiconductor Physics

Project management: Team leadership, logistical coordination, event organization

Soft skills: Intercultural communication, analytical skills, rigor, autonomy
